

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. Pens No. 3500 and 3502 are specially made for Draftsmen for drawing and lettering on drawing paper, which has a more or less coarse surface. They have longer ribs and less sharp points than most others, possess great elasticity and permit of more rapid lettering & drawing, without scratching or catching in the grain of the paper. Draftsmen will prefer these pens to any other kind, as most others are intended principally for drawing on stone.

The Payzant Block Lettering Pens are particularly adapted for lettering Engineers' and Architects' Drawings, for border lines or any heavy line-work, also for the use of merchants for writing price and show cards, etc.

The common method of forming block letters with a fine pen is slow and tedious work and but few draftsmen are capable of executing most lettering with reasonable rapidity. With the block lettering pen a letter is formed as a single stroke. There is no dexterity or knack to acquire to use these pens, as they are as simple to operate as a pencil. All irregularities due to the draftsman's failure to produce equal width and parallel lines in forming letters, are avoided in work done with this pen, because all strokes in any direction are uniform in width and density. Work can be done in one-quarter of the time needed with the fine-pen method. It is unnecessary, even on the finest plans, to carefully outline the letters in pencil before inking, as a rough draft with guide lines is all that is needed. These pens are manufactured in six graded sizes; the following is a reproduction of letters made with them:
